

WorkQuora Engineering Bible v1.0 (Draft)

This PDF summarizes the planning completed so far.

Volume 0 - Constitution

Purpose: Build India's most trusted hyperlocal opportunity marketplace.

Core principles: Trust first, Fair pricing, Hyperlocal-first, Quality over quantity, Privacy, Transparency, Marketplace health, Long-term thinking.

Non-negotiable rules: No fake jobs, no fake workers, no fake reviews, no hidden commissions.

Volume 2 - Product Requirement Document (PRD)

Roles: Worker, Client, Admin.

Major flows: Authentication, Home, Nearby Jobs, Job Details, Proposal, Negotiation, Chat, Job Lifecycle, Ratings.

Core collections: users, workers, clients, jobs, proposals, chats, notifications, reviews.

Volume 3 - UX Architecture

UX principles: 3-click rule, one screen = one goal, loading/error/empty states on every screen.

Worker Journey: Install → OTP → Profile → Nearby Jobs → Proposal → Hire → Payment → Review.

Client Journey: Install → Business Profile → Post Job → Compare → Hire → Payment → Review.

Added enterprise chapters: Design System, User Personas, Onboarding, Activation Metrics, UX Analytics, Search UX, Map UX, Chat UX, Offline UX, Performance UX, Motion, Trust UX, Community UX, Growth UX, Accessibility, Future UX.

Planned Volumes

1. Vision & Business 2. PRD 3. UX Architecture 4. Design System 5. Frontend Architecture 6. Backend Architecture 7. Database Architecture 8. Marketplace Algorithms 9. AI Architecture 10. Infrastructure & DevOps 11. Security 12. Admin 13. Analytics & Growth 14. Company & Legal 15. Future Roadmap 16. Engineering Playbooks (proposed)

Next Milestone

Develop each volume into a detailed engineering manual with diagrams, APIs, algorithms, AI models, database schemas, and implementation guides.
