

WorkQuora Engineering Bible

Volumes 12–15 (Draft Summary)

Volume 12 – Admin Platform & Internal Operations

Defines the internal operating system for WorkQuora. Covers Admin, Manager, Moderator and Support roles, RBAC, dashboards, KYC review, moderation, support center, analytics, CMS, communication center, audit logs, automation and internal AI copilot.

Volume 13 – Payment & Financial Platform

Defines payment architecture, wallet, escrow roadmap, commission engine, settlements, payouts, refunds, invoices, taxation, fraud prevention, immutable ledger, finance dashboards, analytics and enterprise financial operations.

Volume 14 – Communication Platform & Collaboration

Defines real-time messaging, notifications, voice/video roadmap, location sharing, AI communication features, moderation, omnichannel messaging, WebSocket architecture, collaboration workspace and communication analytics.

Volume 15 – Mobile Engineering Platform

Defines Worker and Client mobile apps, offline-first architecture, navigation, device integration, maps, background services, mobile security, release engineering, analytics, performance optimization and future mobile roadmap.

Note: This is a condensed draft. The final Engineering Bible will contain full chapters, diagrams, algorithms, UML, ERD, sequence diagrams, ADRs, SRS documentation, implementation guides and operational playbooks.
